DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 42 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The statute provides for obtaining a patent on a method process or an assembly manufacture, but not both. In this application, claim 42 is a method depending upon an assembly, which is considered to include a plurality of statutory subject matter categories where only an alternative subject matter category is statutorily permitted. Therefore, since the dependency of claim 42 involves a plurality of patentable subject matter categories, it is considered to contain non-statutory subject matter.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34-37 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Caldwell (US 3,176,676).

Claims 38-42 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Saey (US 5,875,772).

Claim 43 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Tuttle (US 6,182,650).

Allowable Subject Matter

Claims 1-33 are allowed. Those claims contain the independently claimed feature of a grill assembly having either a stand alone leg assembly or having a stand alone support assembly supported by a support stand when either coupled together or separated. The closest prior art is considered Tuttle (US 6,182,650) which discloses a Dutch oven pot coupled or separate from support stand, but to those skilled in the art a Dutch oven pot is patentably distinct from a grill wherein Tuttle does disclose a barbeque grill separate from the Dutch pot without stand alone legs or assembly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References C-G, cited in this action, are considered to disclose one or more elements of the claimed invention but do not provide motivation for combining those references to obviate the claimed invention.
